

# GUIDE TO FIND A DANISH RESEARCHER APPLICANTS FROM GHANA AND TANZANIA

Applications from Ghana and Tanzania must include relevant Danish research partners. If partners are not already identified from earlier collaborations or professional networks, it is possible to identify relevant Danish researchers by searching the Danish research database <http://www.forskningsdatabasen.dk/> or international databases such as <http://scholar.google.com/> and <https://www.researchgate.net>. Inspiration can also be found by searching among ongoing and past projects at the Danida Research Portal <http://drp.dfcentre.com/>. An overview of the universities in Denmark is accessed at <http://www.dkuni.dk/english>, with links to each of the eight universities in Denmark, and searching may be done among their researchers, according to subject.

Examples are provided below for a project with the keywords of: *Ghana, agriculture, climate change, food production, livelihood*.

Finding a Danish researcher using the Danish research database <http://www.forskningsdatabasen.dk/>

The screenshot shows the Danish National Research Database interface. The search bar contains the keywords "agriculture, climate change, food production, livelihood". The search results are displayed under the "Publications" tab. The first result is titled "Livelihood implications of biofuel crop production: Implications for governance". The authors listed are Hunsberger, Carol; Bolwig, Simon; Corbera, Esteve; et al. The type of the publication is "Journal article".

Search researchers based on publication authors:

The screenshot shows the Danish National Research Database interface. The search bar contains the name "Simon Bolwig". The search results are displayed under the "Researchers" tab. The search results show "1 entry found". The first result is titled "Simon Bolwig". The ORCID is 0000-0003-1537-7938. The status is "Active". The data providers are "Technical University of Denmark".

## Finding a Danish researcher using <http://scholar.google.dk/> or <https://www.researchgate.net>

By using google scholar to search for Danish researchers you will have to add a Danish university to the other keywords, for example you can add KU.dk to your search.

University of Copenhagen = KU.dk

Technical University of Denmark = DTU.dk

Copenhagen Business School = CBS.dk

Aarhus University =AU.dk

Roskilde University = RUC.dk

Aalborg University = AAU.dk

University of Southern Denmark = SDU.dk

IT University of Copenhagen = ITU.dk

Ghana, agriculture, climate change, food production, livelihood, KU.dk

Articles  Case law

New! Follow related research for key authors

Stand on the shoulders of giants

Search for the last 5 years (since 2013) and enter the articles to see whether the topic is relevant and check author affiliations.

The screenshot shows the Google Scholar search interface. The search bar contains the query "Ghana, agriculture, climate change, food production, livelihood, KU.dk". Below the search bar, there are radio buttons for "Articles" (selected) and "Case law". A red banner says "New! Follow related research for key authors" and a green banner says "Stand on the shoulders of giants". The search results are displayed in a table with columns for filters, article titles, and links. The filters include "any time", "since 2017", "since 2016", "since 2013", "custom range...", "sort by relevance", "sort by date", "include patents", "include citations", and "Create alert". The search results show about 87 results in 0.17 seconds. The first result is a PDF titled "7.1 Forests and Trees Matter for Food Security and Nutrition" by S Mansourian, H Neufeldt, and JA Parrotta, published in 2015. The second result is a PDF titled "A short overview of measures for securing water resources for irrigated crop production" by CR Jensen, JE Ørum, and SM Pedersen, published in 2014. The third result is a PDF titled "The relationships between on-farm shade trees and cocoa yields in Ghana" by R Asare, published in 2016. The fourth result is a PDF titled "Urbanisation, rural transformations and food systems" by C Tacoli and J Agergaard, published in 2017.

By using research gate for searching you will have to use the same principle as for google scholar, though you have to join in as a member.

**Finding a Danish researcher using the Danida Research Portal <http://drp.dfcentre.com/>**

Search for key words, for example “Ghana agriculture climate change”.
